2. Quiz creation via XML file

Browse files

Upload and create

Upload XML

Sample showing what the
XML file should look like.

Sample

```
<quiz>
        <title>cs test</title>
        <description>a cs final</description>
        <essay-questions>
                <essay-question>
                        <question>Q1</question>
                        <answer>ans1</answer>
                </essay-question>
                <essay-question>
                        <question>Q2</question>
                        <answer>ans2</answer>
                </essay-question>
        </essay-questions>
        <multiple-choice-questions>
                <multiple-choice-question>
                        <question correct-answer='a6'>Q3</question>
                        <choices >
                                <choice>a3</choice>
                                <choice>a4</choice>
                                <choice>a5</choice>
                                <choice>a6</choice>
                        </choices>
                </multiple-choice-question>
        </multiple-choice-questions>
</quiz>
```

After the sample xml is uploaded, a quiz is created.
